

ABRAPLEX

DESCRIPTION

Liquid rubbing compound for plexiglass.

This product is expressly formulated for plexiglass and polycarbonate surfaces, such as windscreens of motorboats and aircraft, portholes and more.

Polishing plexiglass surfaces is a particularly difficult operation due to their delicacy: many products on the market are too aggressive or ineffective.

With this product, a polishing cycle structured in a few steps has been developed, which allows an effective solution to the problem.

Free from silicone oils.

CHARACTERISTICS

Base: aqueous emulsion O/W

Appearance: creamy paste

Colour: beige

Specific weight: 1,11 g/cm³ ± 0,05

APPLICATION

Machine application with rotary polisher.

- Eliminate surface marks by sanding with P2500, such as Buflex Blue code K7301515.
(in case of deep marks, it is possible to carry out a first sanding with P2000, such as Buflex Green code K7301513)
- Complete the mark removal and make the surface uniform by sanding with P3000 such as Buflex Black code K7301514.
- Polish the surface with ABRAPLEX liquid abrasive paste on a medium foam pad.
- Finish with Polish T47 or T77 on a soft foam pad.

The effectiveness of our products is based on practical experiences and research work carried out in our laboratories; nevertheless we accept no liability for work carried out following our instructions being clear that the final result depends in all cases on a series of unforeseeable factors.
