

NEW TYRE PNEUS (TIRE RESTORER)

DEFINITION

New Tyre Pneus is a product specifically designed to restore the appearance of tires, rubber mats, and seals. It provides excellent coverage, dries quickly, and leaves no sticky residues. It forms a long-lasting protective layer that helps prevent rubber aging and do no cracks over time. Silicone-free formula.

CHARACTERISTICS

- Chemical nature: solution of resins in organic solvents
- Appearance: liquid
- Color: black
- Solid content: 31 ± 2%
- Density: 0,89 g/cm³ ± 0,02

SUBSTRATE PREPARATION

Surfaces must be perfectly degreased, clean, and dry in order to prevent any residues from interfering with the sanding process.

APPLICATION

Ready-to-use product. Apply with a soft-bristle brush. It can be diluted with nitro thinner depending on the desired level of coverage.

DRYING TIME

Air drying

- Dust-free: 5–10 minutes
- Fully dry: 30 minutes

STORAGE

Store the product in a dry place, protected from direct sunlight, at temperatures between 5°C and 30°C.

The effectiveness of our products is based on practical experiences and research work carried out in our laboratories; nevertheless we accept no liability for work carried out following our instructions being clear that the final result depends in all cases on a series of unforeseeable factors.
