

DILUENTE LENTO

DEFINITION

A blend of slow-evaporating organic solvents, designed for the dilution of two-component acrylic and polyurethane coating systems. Suitable for use where slow evaporation is required to ensure superior flow and leveling.

CHARACTERISTICS

- Chemical Nature: mixture of organic solvents
- Density: $0,88 \text{ g/cm}^3 \pm 0,05$
- Color: colorless

INSTRUCTIONS FOR USE

Dilution must always be performed *after* catalysis. Thoroughly mix the ready-to-use product, then add the thinner according to the ratio recommended in the technical data sheet and the desired viscosity.

It is recommended to carry out preliminary tests to determine the optimal usage percentage for individual operational conditions such as application temperature, compatibility with the coating system.

STORAGE

Store in a cool, dry place, protected from direct sunlight and at temperatures between 5°C and 35°C.

The effectiveness of our products is based on practical experiences and research work carried out in our laboratories; nevertheless we accept no liability for work carried out following our instructions being clear that the final result depends in all cases on a series of unforeseeable factors.
