

COLLA NEOPRENICA A SPRUZZO

DEFINITION

Adhesive based on resins and neoprene rubber in a solvent base.

For bonding: felt, leather, cardboard, wood, hide, cork, plastic, etc.

Do not use activators.

CHARACTERISTICS

- Chemical nature: neoprene rubber and resins
- Density: 0.85 g/cm³ ± 0,03
- Color: straw yellow
- Non volatile matter: 22% ± 2
- Tack time: 10- 15 minutes

APPLICATION

Degrease and clean the parts to be joined – the product is usually applied to both sides.

It can be applied with a brush or, after dilution (Unico SP 21 Thinner), by spraying.

Allow to dry for 10/15 minutes (depending on the absorbency of the materials); drying can be accelerated by heating with hot air or infrared lamps.

Press for a few seconds. It immediately features a high bonding strength that consolidates in the hours following application (approx. 12/24 hours).

STORAGE

Store the product for 6 months, in its original packaging, in a cool and dry place.

The effectiveness of our products is based on practical experiences and research work carried out in our laboratories; nevertheless we accept no liability for work carried out following our instructions being clear that the final result depends in all cases on a series of unforeseeable factors.
