

SPRAY NO19

DEFINITION

Sanitizing spray, specifically formulated for the cleaning and sanitization of surfaces, particularly those subject to frequent contact. SPRAY NO 19 is safe for use on most interior car surfaces. In addition to its sanitizing action, it removes stains and residues.*

SPRAY NO 19 contains 2-Propanol (Isopropanol), which is used in a significant quantity in the formula. 2-Propanol is a widely recognized ingredient employed for its multiple properties:

- Proven Sanitizer: helps to effectively eliminate bacteria and viruses
- Excellent cleaner: acts as a solvent, detergent, and degreaser
- Fast evaporation: evaporates quickly without leaving streaks or residues

* Most car leathers and faux leathers have urethane coatings, which are safe to clean with alcohol. However, over time, cleaning leather with alcohol may make it susceptible to damage and discoloration.

CHARACTERISTICS

- Chemical nature: solvent mixture
- Color: colorless
- Density: $0.67 \pm 0.03 \text{ g/cm}^3$

APPLICATION

For effective sanitization, spray the product, prioritizing the "high touch" areas of the vehicle: steering wheel, dashboard, armrests, gear stick, doors and handles, and ventilation grille.

1. Spray the product from a distance of 20 – 30 cm
2. Allow it to act for a few minutes
3. Aerate the room/vehicle for at least 10 minutes before use

NB. Whatever you want to clean, do not use bleach or hydrogen peroxide inside the car. Both chemicals can annihilate viruses, but they will also cause damage to the vinyl and plastic used in most vehicles.

STORAGE

Store the product in a dry environment, away from direct sunlight, at temperatures between 5° C e 30° C.

The effectiveness of our products is based on practical experiences and research work carried out in our laboratories; nevertheless we accept no liability for work carried out following our instructions being clear that the final result depends in all cases on a series of unforeseeable factors.
