

SPRAY GUN CLEANER WATER BASED CONCENTRATE

DEFINITION

Water-based paint cleaner concentrate for automatic and manual cleaning of spray guns. Cleans both solid and fresh water-based paints (acrylic dispersions and other), dust and grease residues. The product does not damage metal and plastic surfaces. It does not attack the gun body and helps maintaining it functional in the long term. Non-foaming.

CHARACTERISTICS

- Chemical nature: aqueous solution
- Specific gravity: $0,97 \text{ g/cm}^3 \pm 0,03$
- Odour: mild, fresh

APPLICATION

Cleaner is supplied as a concentrate, to be diluted with water in a ratio of 1 : 2 by volume (5 liters cleaner and 10 liters water).

With 5 liters of concentrate correctly diluted it is possible to wash 400-500 guns.

Cleaning is performed by recirculating the product, preferably in designated spray gun washing machines. Due to its good dissolving properties, the product is also suitable for other uses, such as for manual cleaning of the workspace.

Nitrocellulose lacquers are not removed by this cleaner but can be softened or roughened after a long exposure time (test before use).

The product gives the best results when used at room temperature

STORAGE

Store in a cool, dry place, protected from direct sunlight at temperatures in between 5°C and 35°C.

The effectiveness of our products is based on practical experiences and research work carried out in our laboratories; nevertheless we accept no liability for work carried out following our instructions being clear that the final result depends in all cases on a series of unforeseeable factors.
