

## BLENDER

### DEFINITION

**BLENDER** is a product designed to eliminate the differences between new and old clearcoat that occur during touch-up and blending operations, making the transition area smooth and free from optical discontinuities. It is suitable for all types of two-component clearcoats. Also available in spray version.

### CHARACTERISTICS

- Chemical nature: Solvent-based product
- Density:  $0.87 \pm 0.03 \text{ g/cm}^3$
- Color: colorless

### APPLICATION

Product ready for use.

- **With spray gun:** always mix before use.  
Use with HVLP spray gun, nozzle  $\varnothing 1.2 \text{ mm}$ , or HTE spray gun, nozzle  $\varnothing 1.3 \text{ mm}$ .  
Apply one or two light coats immediately after spraying the final clearcoat coat.
- **With spray can:** shake the can before use. Apply two or three uniform coats. After each use, invert the can and continue spraying in order to prevent clogging of the spray nozzle.

When the clearcoat is completely dry (refer to the relevant technical documentation), the surface may be polished if necessary using extra-fine abrasive compound or polishing compound.

### STORAGE

Store in a cool, dry environment, protected from direct sunlight, and at temperatures between  $5^{\circ}\text{C}$  and  $35^{\circ}\text{C}$ .
