

LANA VETRO MAT

DEFINITION

Chopped Strand Mat, made with medium-sized E-glass, silane-treated strands, held together with a binder that is highly soluble in styrene. Suitable for polyester, vinylester, and epoxy resins.

Very easy impregnation, excellent laminate clarity, very high tensile strength. Good resistance to water and chemical agents in anti-corrosion applications.

CHARACTERISTICS

- Moisture content: $\leq 0.20\%$
- Tensile strength: $\geq 140 \text{ N}/150 \text{ mm}$
- Weight: $300 - 450 \text{ g}/\text{m}^2$

STORAGE

The fabrics must be stored dry in their original packaging (ideal conditions between 10°C and 35°C – relative humidity between 35 and 75%).

If the product is stored below 15°C it must be conditioned 24 hours before use to avoid condensation phenomena.

The effectiveness of our products is based on practical experiences and research work carried out in our laboratories; nevertheless we accept no liability for work carried out following our instructions being clear that the final result depends in all cases on a series of unforeseeable factors.
