

## REMOVER RC616

### DEFINITION

Industrial solvent for the treatment and cleaning of plastic and metal surfaces. Suitable for dissolving glues and rubbery adhesives on automotive plastic parts without damaging the surfaces; slightly citrus-scented. Water-emulsifiable product.

### CHARACTERISTICS

- Chemical nature: mixture of solvents and surfactants
- Density:  $0.84 \pm 0.03 \text{ g/cm}^3$
- Color: straw yellow
- Appearance: clear liquid

### APPLICATION

#### **Spray application:**

spray the product neat on the surface to be treated. After a few minutes, brush or scrub and rinse thoroughly with an organic solvent.

#### **Immersion application:**

Immerse the parts in the neat product for a time depending on the resistance of the adhesive residues to be dissolved. If necessary, agitate the area to be cleaned with a brush or scrub and rinse.

Always test the product on a small area of the surface before use to check compatibility.

The product forms an emulsion upon contact with water, which reduces its effectiveness. Do not dilute and avoid storage in humid environments.

### STORAGE

Store in a cool, dry environment, protected from direct sunlight, and at temperatures between 5°C and 35°C.

*The effectiveness of our products is based on practical experiences and research work carried out in our laboratories; nevertheless we accept no liability for work carried out following our instructions being clear that the final result depends in all cases on a series of unforeseeable factors.*
