

STATIGEL

DEFINITION

Clear, water-based liquid that, once dried, attracts and retains dust on the floor. Stati-Gel can be applied on any interior where dust would cause problems.

Can be used for concrete floors or spraybooths, measurement and control rooms, computer rooms etc. Recommended for spray booth floors.

CHARACTERISTICS

- Chemical nature: aqueous solution
- Density: $0,98 \text{ g/cm}^3 \pm 0.02$
- pH: 7,5
- Appearance: clear, greenish liquid
- Yield: $20 \text{ m}^2/\text{liter}$

APPLICATION

The surface to be treated must be clean, dry and degreased.

STATIGEL is ready to use and can be applied with the appropriate applicator. Apply evenly on the surface and let dry. The product remains active for about a week after application. The next application does not require removal of the old layer, but the floor must be free of dust.

The product is easily removed with hot water.

STORAGE

Store the product in a dry place, protected from direct sunlight, at temperatures between 5°C and 35°C.

Keep away from frost.

The effectiveness of our products is based on practical experiences and research work carried out in our laboratories; nevertheless we accept no liability for work carried out following our instructions being clear that the final result depends in all cases on a series of unforeseeable factors.
